"Cut Right" means that "every day of every year" we shall crowd down the prices on everything to the lowest possible notch. It does not mean that the quality of a single article is to be lowered. It does not mean that we will offer as "pure" any adulterated or impure drug or chemical. It does not mean that we will practice or permit substitution in any form. It does not mean that the abarrater of any of our goods will be reduced or
